

Snow and Ice Control Policy

When adverse weather conditions occur, the highway department will respond as soon as possible with snow removal and ice control.

In case light snow and ice, plowing and sanding will be done simultaneously. In case of heavy snow, plowing will be primary duty so roads will be passable as soon as possible, with sanding being done secondary.

School bus routes and the heaviest traveled roads will have priority. The Town of Carrollton will try to keep favorable conditions on all roads.
